

CLEAR

FOR YOUTHFUL VISION ●●●●●●

Youthful vision can be yours...

If you need cataract surgery we have great news for you! Not only can your vision be restored, but you may also see better than ever without corrective lenses!

Following standard cataract surgery many patients are dependent on corrective lenses in order to see well. Our exclusive **NEW CLEAR UPGRADE** with *bladeless Laser Assisted Refractive Cataract Surgery* allows most people to read, drive and do just about anything that fits their lifestyle, without the need for glasses.

What is CLEAR UPGRADE?

CLEAR UPGRADE is a comprehensive set of additional services and procedures before, during, and after cataract surgery resulting in the best possible vision without glasses. Some of those additional services include specialized testing, doctor consultations and examinations, *bladeless Laser Assisted Refractive Cataract Surgery*, and access to premium lens implants and refractive surgeries such as LASIK.

Who is a good candidate for CLEAR UPGRADE?

Luckily most patients that need cataract surgery are great candidates for **CLEAR UPGRADE**.

What's next?

You will undergo additional tests. Our doctors will review the results of these tests and your vision preferences. A recommendation will be made regarding specialized lens implants, to determine your qualification for *bladeless Laser Assisted Refractive Cataract Surgery* or for possible refractive surgery, such as LASIK. Your cataract surgery will be tailored for each eye. Our doctors will closely monitor your recovery. We will work hard to reach your visual goals.

Why choose CLEAR UPGRADE?

The answer is **CLEAR**, no pun intended! If you want to experience the vision freedom of your youth; to see better with little or no need for glasses or contact lenses, then say "Yes!" to **CLEAR UPGRADE** today! If you want the most advanced cataract surgery using a laser and no blades, then say "Yes!" again.

Konrad Filutowski, MD with LenSx® Laser

Before Cataract Surgery

- Distorted colors
- Blurred vision

After Standard Cataract Surgery

- Restored colors
- Blurred vision without glasses for many patients

After Cataract Surgery + CLEAR Upgrade

- Restored colors
- Clear vision without glasses for most patients

"I am thrilled to be first in our area to offer my patients laser technology for cataract surgery. It gives my patients a new feeling of confidence and comfort. I believe that CLEAR UPGRADE with bladeless Laser Assisted Refractive Cataract Surgery has the potential to give my patients the best possible vision." — KONRAD FILUTOWSKI, M.D.
